THE KEY TO BALANCE

RAFFLES JAKARTA'S PATH TO GREEN HOSPITALITY

WELCOME TO RAFFLES JAKARTA'S *sustainability* JOURNEY

Raffles Jakarta is dedicated to creating sustainable value and actively contributing to both the planet and the community. Aligned with our Sustainability Programme, we strive to offer “Positive Hospitality” that fosters connections and generates beneficial outcomes for all our guests, while diligently working to minimise the environmental impacts of our operations.

Together, we can make a meaningful difference for our planet and future generations.

OUR COMMITMENT TO SUSTAINABILITY

In our commitment to excellence, we meticulously evaluate our greenhouse gas emissions to minimise our environmental footprint. These careful calculations act as our guiding compass, steering us toward sustainable practices. This approach not only enlightens our guests about their own carbon footprint but also warmly invites them to join us in combating climate change, fostering a shared journey towards a more sustainable future.

SECTION 1

RECYCLING & UPCYCLING

UPCYCLING LINEN

At Raffles Jakarta, sustainability takes shape in meaningful ways. Our Upcycling Linen initiative reflects a commitment to preserving resources and reducing textile waste within the hospitality sector.

By giving used linens a second life, we turn them into hand-crafted pieces that celebrate creativity and purpose while empowering women in subsidised housing to showcase their skills in collaboration with JKT Creative.

Guests staying in our Suites are presented with a hand-embroidered shirt, thoughtfully crafted to embody care and purpose. Those in Raffles Rooms will receive a uniquely designed pouch, each piece telling a story of sustainability and empowerment. This initiative underscores Raffles Jakarta's dedication to thoughtful luxury, community support, and a deeper connection to the world around us.

WATER RECYCLING

Raffles Jakarta proudly embraces water recycling, transforming polluted water into a precious resource of clean water. Nestled within our picturesque Hendra Gunawan Garden, we utilise this recycled water, sourced from a meticulous filtration process that reflects our commitment to sustainability.

This not only nurtures our verdant oasis but also honours the conservation of invaluable resources, ensuring that the water quality adheres to the highest standards.

IN-HOUSE PLANT NURSERY

Tucked away in a quiet corner of the hotel's garden, our nursery is where skilled hands carefully plant, nurture, and cultivate a variety of herbs, flowers, and tropical foliage. Each seed is thoughtfully chosen, reflecting the rich biodiversity of Indonesia, and every plant is grown with the same care and attention to detail that defines the Raffles experience.

The plants are more than ornamental, they reflect the heartbeat of the hotel and cared for with intention and love. Regular watering, pruning, and tending are carried out by skilled hands, ensuring that every leaf, bloom, and stem thrives.

HERBS GARDEN

We cultivate a variety of herbs and plants, including Java Tea, Turmeric, Screwpine Leaf, Galangal, Lemongrass, Rosemary, and Mint Leaf.

We utilise them to create refreshing welcome drinks and incorporate them into our garden-to-table menu, offering guests a taste of locally sourced and freshly harvested ingredients.

SECTION 2

ELIMINATING SINGLE-USE PLASTICS

As part of Raffles Jakarta’s commitment to sustainability, we continuously strive to eliminate excessive plastic packaging through its No Plastic Initiative, both in guest-facing areas and behind the scenes.

ALVA WATER

Our in-room Water Filtration System eliminates the need for bottled water for our esteemed guests. Alva water dispensers are not only equipped with high-performance filtration and purification technologies but also offer antimicrobial protection.

Each Alva water purification system has undergone rigorous testing and has received accolades from the world's foremost certification bodies, ensuring that we uphold the highest standards in quality and refinement.

SUSTAINABLE PACKAGING - CERTIFIED FSC (FOREST STEWARDSHIP COUNCIL)

At Raffles Jakarta, we proudly utilise biodegradable packaging crafted from biopolymers—natural molecules found in living organisms like cellulose and proteins. Since November 2022, we have embraced these biodegradable materials for our To-Go packaging, which gracefully breaks down and decomposes over time, being primarily composed of discarded plant products.

LUXURY ROOM AMENITIES

Raffles Jakarta embraces sustainability with the introduction of ceramic dispensers for wet amenities. Moving away from single-use plastics, these beautifully designed vessels embody a commitment to reducing waste while maintaining the essence of luxury.

Each dispenser is a reflection of thoughtful craftsmanship, enhancing the guest experience with both purpose and style. By weaving sustainability into the everyday, Raffles Jakarta reimagines indulgence as an act of care, for both our guests and the planet.

SECTION 3

REDUCING CARBON FOOTPRINT

ECO-CONSCIOUS TRAVEL

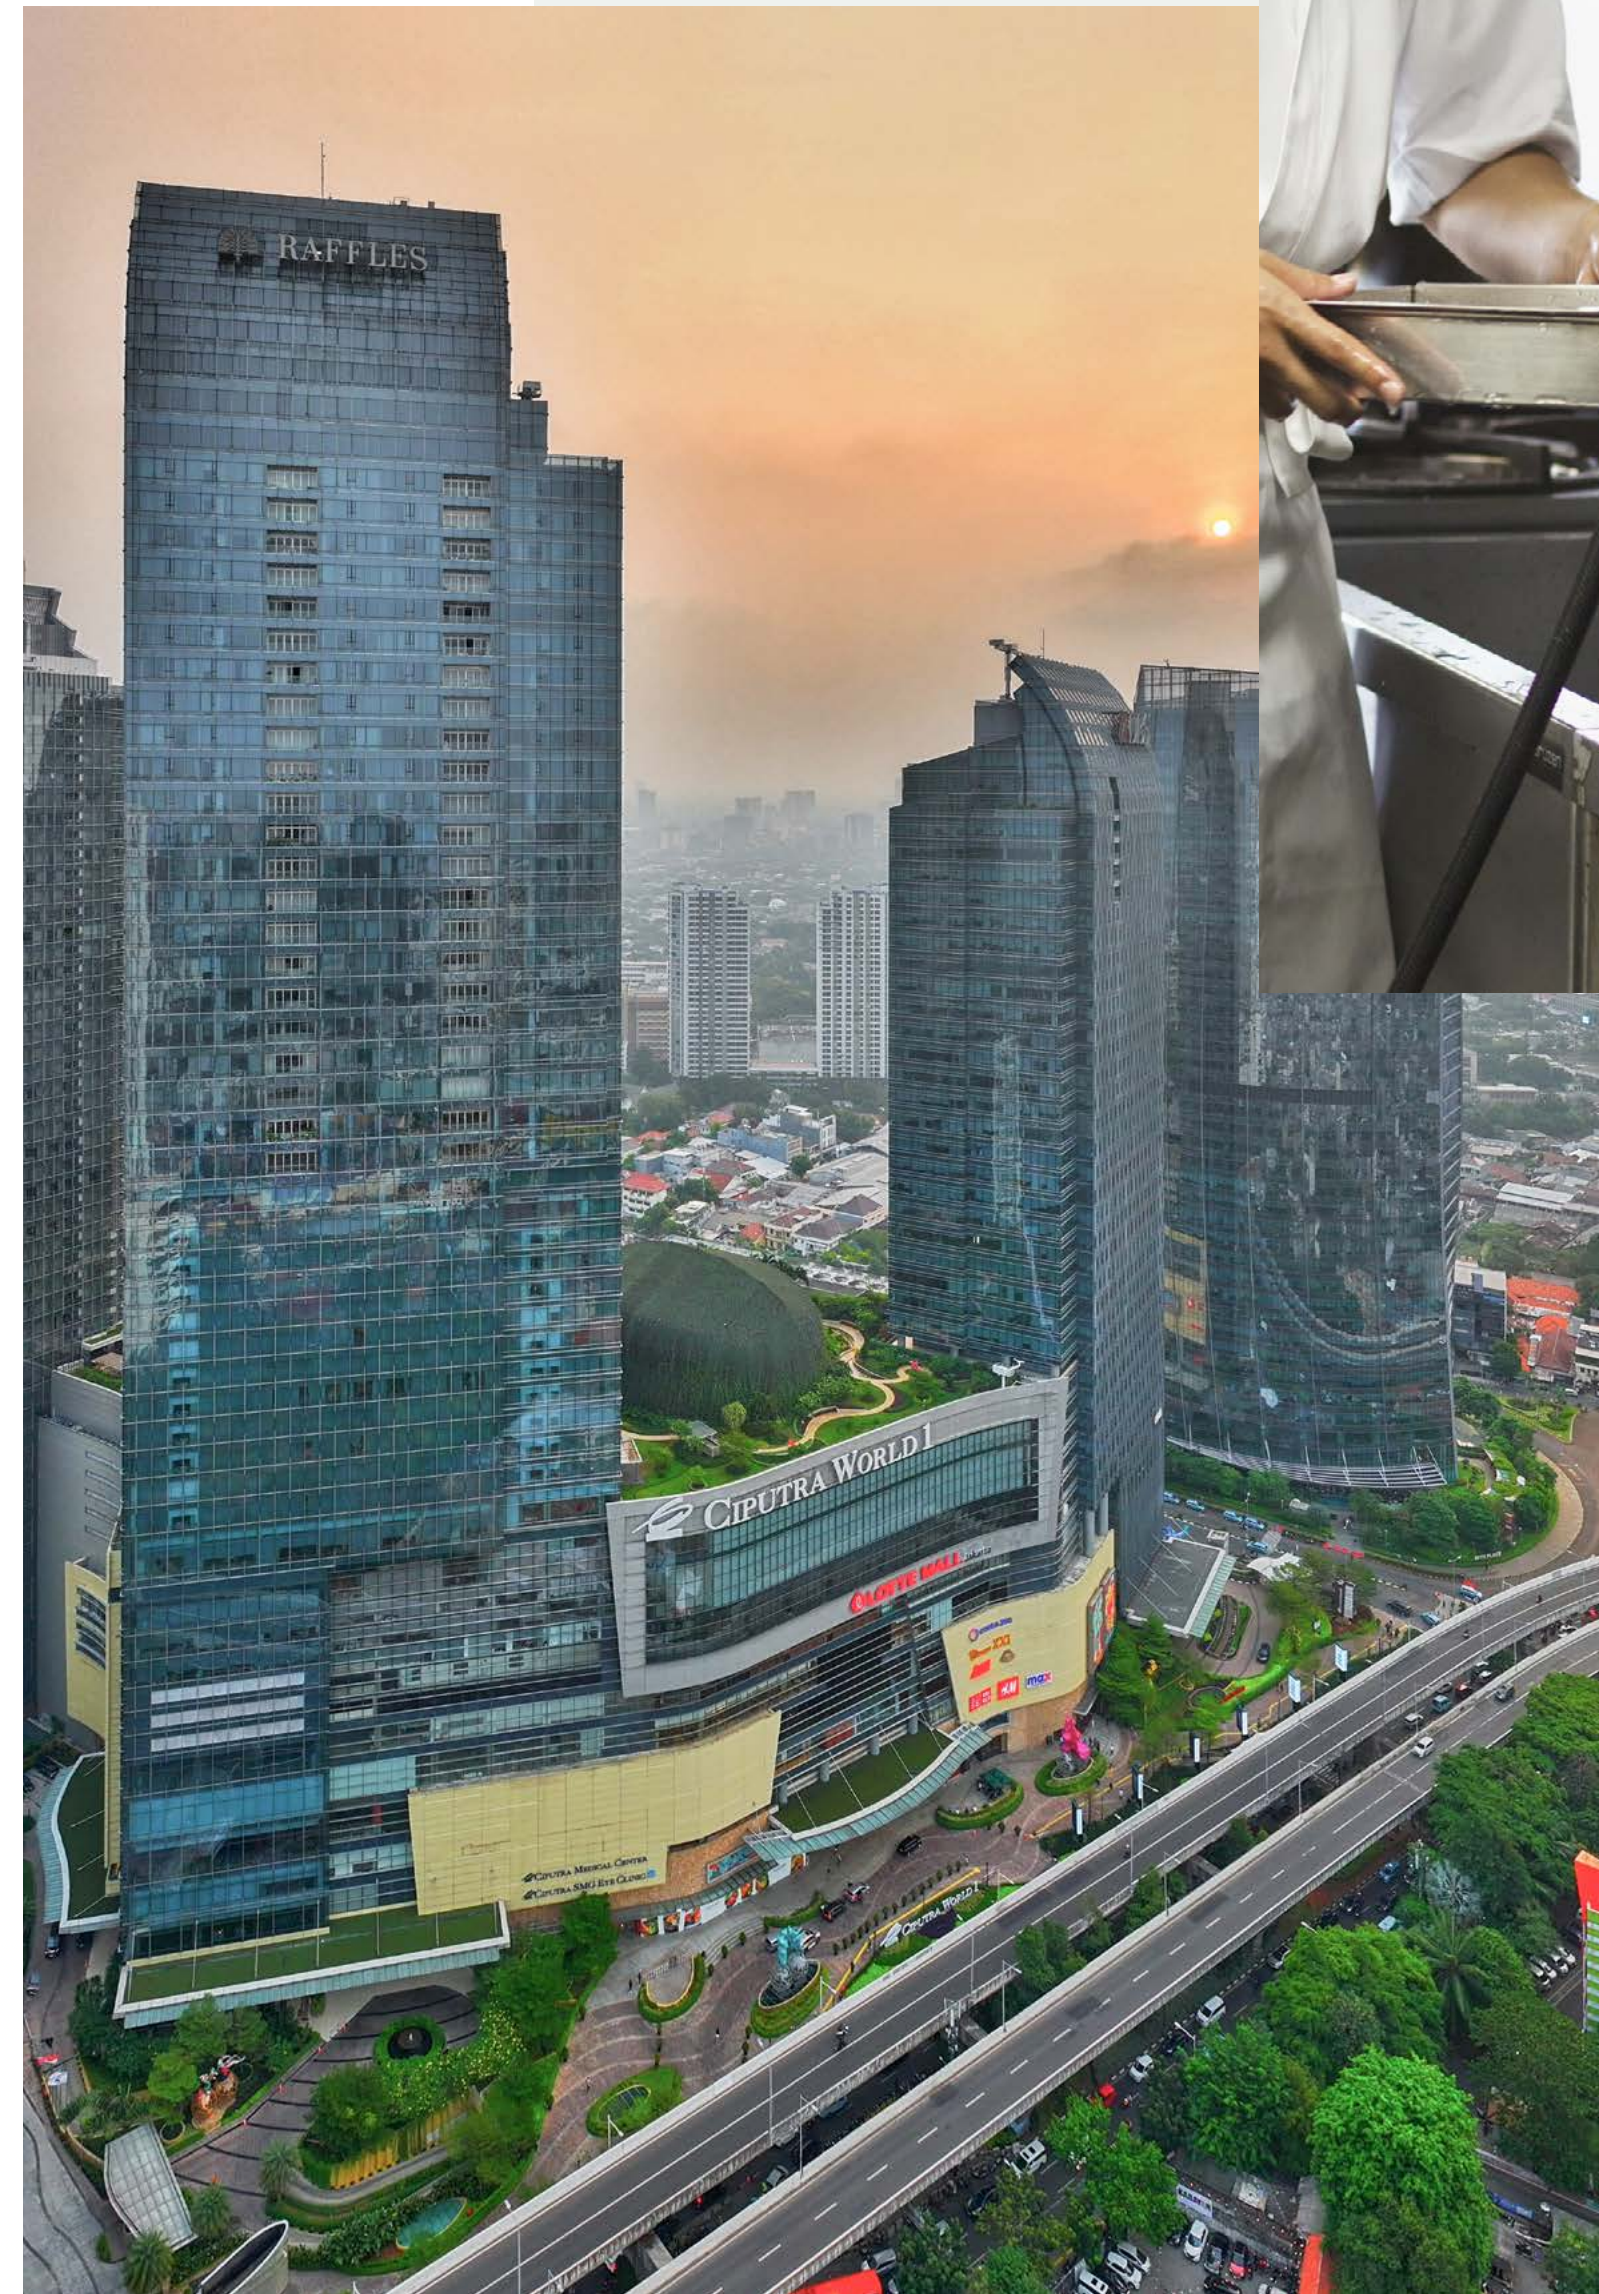

With a thoughtfully curated selection of eco-friendly and electric vehicles, we embrace a greener way to travel. Raffles Jakarta offers vehicles that are available for seamless airport transfers or explorations of the vibrant cityscape, offering guests a mindful and elegant travel experience.

This initiative reflects our commitment to reducing carbon emissions while maintaining the signature sophistication of Raffles. By providing eco-conscious transportation, we not only honour the planet but also reimagine the journey as an opportunity to move with purpose, responsibility, and style.

REDUCING FOOD WASTE

Globally, one-third of all food produced is wasted, placing immense pressure on Earth's essential resources, including farmlands, freshwater, and non-renewable fuels.

At Raffles Jakarta, we are committed to minimising food waste by embracing composting and utilising an advanced food waste management system to carefully monitor the waste generated on our property.

SECTION 4

SUPPORTING LOCAL COMMUNITY

CULTURAL CONSERVATION WITH MUSEUM CLEANUP

Honouring the past and cleaning for the future. As part of our CSR programme, Raffles Jakarta visited the historic Museum Bahari, a symbol of Indonesia's rich maritime heritage. Our Housekeeping team shared valuable expertise with the museum staff, contributing to the preservation of this 17th-century Dutch warehouse and its storied legacy.

ROOTING FOR A GREENER TOMORROW

Hands in soil, hearts for nature. Our team came together to plant trees, recognising that each tree we plant is not just for today but for generations to come. We understand the profound impact even a single tree can have on the earth; cleaner air, a richer ecosystem, and a step towards a more sustainable future.

SOCIAL COMMITMENT

We prioritise work opportunities for disabled individuals and are committed to diversity, equity, and inclusion for all our colleagues, allowing everyone to grow and be themselves in a supportive environment. By valuing diverse perspectives and backgrounds, we foster an inclusive culture that empowers everyone to share their unique talents.
